

# Reach CC11 4K Capture Card

The Reach CC11 is a low-cost 4K capture card converter for HDMI to USB-C signals. The CC11 integrates seamlessly with Reach Bee Series devices and allows you to output into your video conference software like Zoom, Google Meets, MS Teams etc. When connected with Reach Bee products, the CC11 enables your video and presentation inputs from your Bee device to be displayed in your video conferencing software. Ideal for distance learning, training or house of worship applications. The CC11 also works with all major streaming software
